Bulgaria

Bubble Painting

Bubble painting is a fun way to create art without a paint brush! With just a few basic supplies, these colorful paintings are easy to make with the kids.

We need the following components:

- ***Tempera paints;***
- ***Liquid soap;***
- ***A teaspoon of sugar;***
- ***Hot water;***
- ***A straw;***
- ***White sheet of paper.***

We dissolve the different colors of paint in the water, add the soap and sugar and... *start creating art.*

First, we make bubbles with each of the colors until the colored bubbles are mixed.

After all the colors are mixed, we put a white sheet of paper on the colored bubbles.

We repeat this step several times so that the colors blend well enough on the white sheet of paper.

After that, the children enjoyed the colorful drawings they created.

Thank you for your attention!
